Version Date: 9/10/2013

Purpose of this export format is to transfer appraisal and levy roll information from the Appraisal District to Tax Offices. This export can be generated at any time from PACS. It can be used for the yearly transfer of information in July / August as well as Supplement Roll information throughout the year.

File naming convention: Based on a configuration setting there are two file and directory naming conventions. The first is for those who's file system supports long file names. The second is for those computer systems that support only 8.3 file names.

Naming convention 1. Each file name is preceded with two field. The first field is the date of the export in YYYY-MM-DD format. The second field is a unique identifier that is assigned at the time of the export, the "dataset_id". Followed by the name that designates what record type is in the file.

Example filename: 2004-10-07_000001_APPRAISAL_HEADER.TXT

Naming convention 2. Each file is assigned an 8.3 file name and is placed in a directory named as follows: The first field in the directory name is the date of format. the export in YYYY-MM-DD. The second field is a unique identifier that is assigned at the time of the export, the "dataset_id". Followed by _APPRAISAL

Text color convention: All items highlighted in red are items that have been changed since the previous version of the transfer layout.

File #1: Header File (APPRAISAL_HEADER.TXT) Short file name (APPR_HDR.TXT)

File #2: Property (APPRAISAL_INFO.TXT) Short file name (PROP.TXT)

Programmer Note: The PACS Appraisal System allows for more than one owner on a property: therefore, there could possibly be entries in the property file that have duplicate property id's. The distinguishing fields for the property file are:

int(12) numeric(5) int(12) int(12) prop_id prop_val_yr owner_id sup_num

**Change for 2005
There is one record for every property and every owner. Prop ids are no longer the same for UDI accounts.
Prop ids are now unique.

File #15: UDI Conversion File (migration from Version 7.0 to 8.0) Short file name (UDI_7_8.TXT)

Programmer Note: The 8.0 version of PACS restructured the UDI (Multiple Owner) Properties Version 7.0 allowed for multiple owners on 1 property. Below is an example from version 7.0:

Prop ID	Owner ID	Name
10000	5000	John Smith
10000	5001	Mary Smith
10000	5002	Mike Smith

Version 8.0 we reworked the UDI properties so that each owner will have a unique property id.

Prop ID	Owner ID	Name	UDI Group
10000	5000	John Smith	35001
10001	5001	Mary Smith	35001
10002	5002	Mike Smith	35001

To aid the developer in the conversion process of UDI Properties, we have created a file that shows how the UDI property existed on 7.0 and also how it was converted into 8.0.

Field Name					
Original PID	int(12)	1	12	12	Property ID on the 7.0 format
Owner ID	int(12)	13	24	12	Owner ID
Owner Name	int(12)	25	94	70	Owner Name
New PID	int(12)	95	106	12	Property ID on the 8.0 format for the specific Owner
UDI Group	int(12)	107	118	12	UDI Group this property is associated with.
